## P28 22/23 Any Other Business

Members had received a copy of “A Vision for An Advanced Manufacturing Innovation Park, Chatteris” from Stainless Metalcraft.

The document outlined the company’s vision for the park and the reasons behind the planned development of an advanced manufacturing park in Chatteris. The document formed part of the company’s submission to FDC on the emerging Local Plan (the area having been included in the draft as industrial land). The park had also been put forward to central government as a potential investment zone by the Combined Authority. The Council’s support for the park was sought.

Members agreed they fully supported the Innovation Park idea and thought it was a brilliant concept. They pointed out they were in favour of any idea which would bring new industry and benefits for the town.

But members said they were seriously concerned about the lack of a footpath and cycleway connection from the Park to the underpass allowing a safe passage into town.

The document outlined the importance of creating pedestrian and cycle friendly links and the fact that the park would be a well-connected hub and gateway to Chatteris but failed to mention the missing footpath and cycleway link between the site and the existing footpath/cycleway along the A141.
